Job-listing data accuracy audit — Kariyer Kapısı (Türkiye)

Sample work summary. 5 public-sector job listings; 3 official sources; checked 13.10.2026, the Millî Saraylar discrepancy re-checked 14.10.2026 21:14. Kariyer Kapısı is Türkiye's official public job portal.

What was checked?

One position from each of **5 open listings** on Kariyer Kapısı (5 different institutions) was selected, and **11 fields** were compared across three sources: institution, job title, province / quota, application start, application end, KPSS requirement, education / field, age limit, documents / certificates / licence, selection method, where to apply.

S1	Kariyer Kapısı structured fields (listing data)
S2	Kariyer Kapısı listing text (verbatim quote)
S3	The institution's own announcement or listing PDF (verbatim quote)

Key figures (55 position × field comparisons)

46	1	6	2	55
consistent	different (two official sources)	not in source	needs interpretation	comparisons in total

Consistent: the sources containing the field give the same value. Different: two official sources give a literally different value. Not in source: the field is missing from at least two sources. Needs interpretation: the sources express the same information differently.

Method

- Official sources only: Kariyer Kapısı listing data and text; the institutions' own announcements (millisaraylar.gov.tr, personeldb.ankara.edu.tr, pdb.itu.edu.tr, marka.org.tr, spk.gov.tr).
- Every value was recorded with a verbatim quote from its source; on every build a script re-checked that each quote appears unchanged in the source text. One scanned Official Gazette notice was read with OCR and checked manually against the page image.
- The URL and access time of every source were recorded; the source page that differed was downloaded a second time to confirm the same content.

Sample finding: application end date

Listing	Millî Saraylar (National Palaces) Administration · Security and Protection Officer (Istanbul, 80 posts)
S1 · KK structured field	2026-10-22T23:59:00
S2 · KK listing text	“Başvurular 12.10.2026 tarihinde başlayıp, 22.10.2026 tarihinde sona erecektir.” (Applications open on 12.10.2026 and close on 22.10.2026.)
S3 · Institution notice	“…12-20 Ekim 2026 tarihleri arasında elektronik ortamda yapılacak…” (…will be made online between 12 and 20 October 2026…) (millisaraylar.gov.tr, DuyuruDetay/2243)
Result	**Different.** Re-checked on 14.10.2026 at 21:14; none of the three sources had changed. This work did not determine which one prevails; candidates are advised to confirm with the institution.

Limits

- **Sample scope:** 5 positions and 11 fields; not all listings. Contains no personal data.
- **A point-in-time check:** sources were read on 13.10.2026 (the Millî Saraylar discrepancy was re-checked on 14.10.2026); later corrections are not reflected. The Official Gazette website could not be reached during this check.
- **The official text prevails:** application decisions must be based on the institution's official listing.
- **Not an automated continuous service:** a one-off sample prepared with scripts plus manual verification.

How could we work together? We pick one step of your own process (for example a placement-period shortlist or a source comparison for specific job listings) as a sample, and agree the scope and delivery format together. We would like to start with a short call to understand what you need.
