# Placement eligibility pre-check — KPSS-2025/2 (Türkiye)

Sample work summary. Fictional candidate profile; past-period (KPSS-2025/2) data; source: official ÖSYM documents. KPSS is Türkiye's central public-sector staff selection exam; ÖSYM is the national exam authority.

## What was checked?

For a fictional candidate (full-time Business Administration bachelor's graduate, 2024 KPSS P3 score 78.00, preferred region: the 13 provinces of Central Anatolia including Ankara), **276 post rows** (513 posts) in these 13 provinces in KPSS-2025/2 Table 3 were reviewed one by one. Two separate questions were answered separately:

- **Eligibility:** do the candidate's education (degree) and special condition codes **allow an application to this post?** The score is not used in this classification.
- **Past placement score:** the score of the last candidate placed on that code in KPSS-2025/2 (lowest score). This is the realised result of a past period; **it is not a forecast**.

## Key figures (eligibility, 13 provinces)

| 20 | 20 | 236 | 39 / 0 | 0 |
|---|---|---|---|---|
| Eligible 78 posts | Needs checking 74 posts, extra condition code | Not eligible 361 posts | visual checks / mismatches | missing rows in the false-negative check (40/40) |

“Eligible” does not mean the candidate would be placed with 78.00 points. In this sample, for all 40 codes in the Eligible + Needs checking list, the 2025/2 lowest score was above 78.00 (historical information).

## Method

- Official ÖSYM documents only: Placement Guide and Table 3 (18.12.2025), bachelor's qualification codes, Special Conditions, graduate field list; 2025/2 lowest/highest scores (07.01.2026).
- The combination rule was quoted from the guide with page numbers: education codes combine with OR (NOTE box, PDF p. 2; art. 3.3, p. 12), other special qualifications with AND (art. 3.2, p. 12).
- All 990 rows of Table 3 were parsed (0 missing, 0 duplicate); each row carries its Table 3 page number.
- Human verification: 13 rows were compared field by field against page images in two documents; 39 checks including code definitions, 0 mismatches. It was also counted separately that every row open to a Business Administration graduate is in the list (0 missing).

## Sample row

| | |
|---|---|
| **ÖSYM code / institution** | 302010486 · Ministry of Environment, Urbanisation and Climate Change · Contract staff / Office staff · Ankara · 17 posts (Table 3, PDF p. 2) |
| **Qualification codes** | 4421 4429 4431 4449 4459 4475 4503 4505: Business Administration is covered by **4431**; no extra condition code |
| **A · Eligibility** | **Eligible**: the candidate may list this code |
| **B · Past placement score** | 2025/2: quota 17, placed 17, lowest score 80.71056 (results PDF p. 2). 78.00 was below this score. Historical information, not a forecast for 2026/2. |

## Limits

• **Fictional profile:** it does not belong to a real person; additional information such as certificates or language scores was ignored (hence the “Needs checking” class).

• **Past period:** prepared with KPSS-2025/2 documents; 2026/2 quotas and scores will differ. It does not promise any chance of placement.

• **The official text prevails:** the final check must be made by the candidate against the official guide and tables.

• **Not an automated continuous service:** a one-off sample prepared with scripts plus manual verification.

**How could we work together?** We pick one step of your own process (for example a placement-period shortlist or a source comparison for specific job listings) as a sample, and agree the scope and delivery format together. We would like to start with a short call to understand what you need.
